REQUEST FOR BASE RATE ACCOUNT

The City of Alamogordo allows residential homeowners to place their city utility account on base rate status if the property is to be vacant for a period of time. When placed on base rate status the water service is shut off at the meter, garbage service is discontinued and sewer consumption and the convenience center fee is not charged. While on base rate status the monthly city utility bill will consist of the base rates for water and sewer – currently $13.90 & $13.60 respectively – and the monthly capital surcharge of $1.00.

If the City records any water consumption while a customer is on base rate status the account will be automatically returned to full service status and all charges/services will be reinstated and charged to the property owner.

I _____, owner of the residential property located
Print Name Legibly

at _____ request the City of Alamogordo,
Address

Customer Service Division, place the utility account # _____
Utility Billing Account Number

on Base Rate Status. I understand that water service will be turned off to the property at the meter, garbage service will be canceled and that my monthly City of Alamogordo utility bill will consist of the Commission approved base rates for water and sewer as well as the Commission approved capital surcharge.

I agree that should the City of Alamogordo record any water consumption at the above listed address while the account is in base rate status that all services will be automatically restored without prior notice to me and billed monthly.

I have read and understand this Base Rate Request.
