

# Magnetic Slime

As featured in this summer's interactive movie night.

Mix:

¼ cup liquid starch

2 T iron powder

Add:

¼ cup glue

Mix with a stick or spoon until 'clumpy', then start squishing it in your hand. It may stain your hands at first, so you might want to use disposable gloves, but once all the liquid is absorbed it should be safe to handle!

Now grab a magnet or two and see what your slime will do!
