

DESERT CRITTERS TRAIL

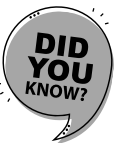

← ALAMOGORDO, NM →

CRITTER MAZE

Help Kalahari the Kangaroo Rat escape the maze and get to some delicious seeds!

Did you know that Kangaroo Rats are Granivorous (grain-eating), and exclusively eat seeds from plants? They use fur-lined cheek pouches to gather seeds that they store in their burrows where they spend most of their time.

Learn more about the Desert Critters Trail in Alamogordo's Washington Park, and all the local animals included along the trail, on our website at tiny.cc/desertcrittertrail
